MARKET HAS A VERY STRONG TONE

Small Number of Securities Hold Attention of the Brokers.

HEAVIEST WEEK ON 'CHANGE IN THREE YEARS

Steady Sales in Columbus Consolidated: Continues Its Climb.

The transactions on the Salt Lake stock exchange for the last few weeks, especially the week just closed, indicate that the local market is entering an era of great prosperity, and lead to the prediction that the earliest palmy days of the exchange will be eclipsed. The week ending December 9 was the best week in two years. This caused general encouragment among the brokers, but they did not expect that the week ending December 16 would prove the best week in thre years, and the half-day Saturday session the best single session of the exchange i the same length of time. The transact the Saturday single sessio amounted to 19,050 shares or \$16,069.75, an those for the week, 219,665 shares or \$103, 421.45.

Market Has Strong Tone.

Market Has Strong Tone.

It is evident from these figures that the local market closed the week with a good strong tone and that the trading was extremely lively. The operations at the Saturday session were truly surprising, and, as a single session, it surprised all other sessions of the week on exchanges. However, only a comparatively few of the securities on the board held the attention of the investors to any great extent. Columbus Consolidated was the particular bright star of the session, in consequence of the greatly improved showing at the property.

Continues Its Climb

Continues Its Climb.

Columbus Consolidated faced the brokers at the opening of the informal call Saturday in a stronger condition than he has ever before in its history. The first bid for the stock was \$4.02\%, which was 7\% cents higher than the best figure that prevailed Friday. A lot of 100 shares was exchanged at that price and immediately the bidding became spirited, with the result that a better figure was obtained on every sale, as the trading continued. The stock closed the day at \$4.50, making an increase for the week of \$1.21.

Beck Tunnel Rises.

Beck Tunnel Rises.

Beck Tunnel made the next best showing in the trading Saturday and took an encouraging upward movement. It opened the market around 50 cents, but, there being quite a demand, it began to ascend in the bioding. There was quite a little trading and by the close of the session it went to 58 cents in the selling. Little Bell took a further bike up the board in the trading. There was quite a demand for the stock, but few holders of the security let go. In the initial sale, the stock brought \$4.50, 15 cents better than the highest figure that was obtained Friday. The bidding price immediately advanced 30 cents more, the next sale netting \$1.70. It declined slightly then, but railled in the trading on the open board.

Wabash Declines Slightly.

Wabash Declines Slightly.

Wabash declined slightly Saturday, as compared with the figure that was obtained Friday, but only a few shares were thrown on the market. It sold down as low as \$1.11. There can be no doubt, however, that a rally will occur in the price in the next few days and that the stock will continue the climb it began several days ago. The closing quotations of the session follow:

DEAL FOR PHOSPHATE GROUND IS CLOSED

Land Lies at Junction of Boundary Lines of Wyoming, Idaho and Utah.

A mining deal of considerable mag-A mining deal of considerable magnitude was consummated in Salt Lake City Saturday when Charles C. Jones of Cokeville, Wyo., completed the final details of the purchase by the Union Phosphate company of San Francisco of the Jones phosphate land in Wyoming, Idaho and Utah. The ground comprising several thousand acres, lies at the junction of the boundary lines of the three States.

Backed by Chemical Concern.

Backed by Chemical Concern.

The Union Phosphate company is of recent organization and is backed by the Stauffer Chemical company of San Francisco of which C. Deguige is president. The mining headquarters of the company will be located at Cokeville, Wyo., and shipments to the super-phosphate plant new being erected on San Francisco bay will begin early next spring. Mr. Johes retains a large interest in the company. He was the ploneer discoverer of the phosphate ground, having located it about eighteen months ago.

Boston Copper Market.

James A. Poliock & Co., brokers, received is following message from Boston Saturday. the following message from Boston Saturday, over their private wire: "United Copper continues the feature among the copper shares, but there is picaty of activity throughout the balance of the list. There was more or less profit-taking and reactions were seen in some places, but the market is well sustained and shows a very firm undertone outside of leaders. There was no manipulation today and the market was left to itself. If acted well and showed plenty of trading outside of manipulation, closing prices being irregular."

Ore and Bullion.

The ore and bullion report for Saturday, as given by McCornick's bank, follows: Ore, \$27,160; bullion, \$41,400. Silver was quoted at 65% cents.

Mining Notes.

Metallurgist A. J. Bettles of the Newhouse staff, who returned from Bingham Friday night, states that the work of constructing the five-stamp teat mill on the Boston Consoil-dated property is progressing rapidly, and that the plant will be in operation by the first of the new year.

General Manager George Dern of the Con-solidated Mercur property came to Sait Lake Saturday from Mercur, accompanied by his wife, to go Christmas shopping. He reports that everything is running along smoothly at the property.

The report that Samuel Newhouse has been given an option upon the entire capital stock of the Ohlo Copper company was denied at the offices of that company Saturday. Col. John Wier of New York, president of the Newada-Utah Mines and Smeiters corporation, who has been in Utah and Nevada for several weeks inspecting the properties of his company and mapping out future work, has returned to

TRADE IN MILWAUKEE

Dealings in Puts and Calls Capture Chicago Brokers.

CHICAGO, Dec. 16.—A number of the largest grain and commission houses in the city today informed their customers that after today they would refuse to deal in "bids" and "offera." Ever since the practice of dealing in "puts" and "calls" has been prohibited by law, a number of houses chave been handling "bids" and "offers," which in a large measure have usurped the place of the former privileges. former privileges.

The dealings in puts and calls will, it is expected by brokers in this city, by transferred to Milwaukee and as a result there was today a decided increase in the

prices of memberships on the Milwaukee board of trade. O'Brien Goes to Copenhagen. ROME, Dec. 16.—Thomas O'Brien, the American Minister to Denmark, after a short stay in Rome, left here for Copen-hagen today.

STRIKE IN CHERRY CREEK DISTRICT

Rich Ore Uncovered in Mine of the National Mining Company.

CARRIES GOLD, SILVER, LEAD AND ZINC VALUES

Property Gave Up Great Quantity of White Metal in the Early Days.

The news of a big strike on the property of the National Mining company, located in the Cherry Creek district of White Pine county, Nevada, reached the local offices of the company in this city Saturday, accompanied by samples of the ore uncovered. The rock was sent immediately to an assayer and late Saturday afternoon Secretary-Treasurer C. N. Sampson learned that the ore carries the high values of 255 ounces in silver, 3 7-10 per cent zinc, 16 5-10 lead and about \$20 in gold.

Strike Made in Tunnel.

The rich find was made in a cross-cut tunnel, work on which was recently resumed. The mine, it is said, by idle many years, but in the early days was classed as one of the big silver producers of Nevada. In 1877 the mine gave up \$125,of Nevada. In 1877 the mine gave up \$125,000 in the white metal. A little more than
a year ago it passed into the hands, by
purchase, of P. H. Cannon of Cherry
Creek. He, in turn, sold it to the capitalists at present composing the National Mining company, about three in oths
ago. They immediately began an extensive campaign of further development
of the property. The tunnel was retimbered and new equipment installed.

Decided to Sink Winze.

A few-days ago it was decided to sink a winze on the east side of the tunnel opposite the drift in which a great tonage was secured in the early days, at which time the miners were puzzled through the apparent abrupt termination of the ledge in the tunnel. On the cast side of the tunnel there were apparently no indications that the ledge continued in that direction.

Ledge Disclosed.

As an experiment, a winze was started recently in the east side of the tunnel, as stated above. Only two and a half fret of rock had been broken down, when the continuation of the famous ledge was discontinuation of the lamous leage was in-covered. Samples of the ore were im-mediately shipped to Salt Lake. The rock looked like good stuff, but the of-ficials of the company had no idea that it would run as high as the assay showed, and consequently they are very jubilant.

Has Several Veins. In addition to this rediscovered big vein, the property has various other veins that average \$20 in gold and silver, and it is this class of ore that the miners have been working since operations were resumed, until the right find a few days ago. Shipments will be made from the property in the near future. The company owns seven claims in the Cherry creek district and five claims at Contract, Elko county, Nevada.

Review of Nevada Situation.

Nat Boas, San Francisco correspondent of James A. Pollock & Co., over their private wire Saturday reviewed the week's situation in the Nevada mining stocks as

Trading in Tonopah and Goldfield mar-"Trading in Tonopah and Goldfield markets shows the greatest activity since last year's boom, especially as regards Goldfield stocks. Considerable manipulation has been done; nevertheless operations show quite a number of buying criters in, and mine conditions are on sound basis. Ore shipments last week were small, due to hability of the rall-road companies to get every for ours. Montana is coming in it bundles from Western people and nearly every share has gone East. I-hiladeping, Pittsburg and New York have been very large mayors. Ore shipments were 21 tons. Although stock is an excellent investment, which stock is an excellent investment, waid deem it advisable to hold off, as it will possibly go a little lower. Skipping of the second divide of is already discounted.

deem it advisable to hold off, as it will possibly go a little lower. Skipping of the second divide at is already discounted. Midway's shipment was 45 tons, and a dividend of 5 cents is certain every quarter. The company is endeavering to make a large shipment, as one is being blocked out and development work is progressing rapidly. MacNamara tooks like it was going lower, as borus Smith won at the election and elected three directors out of five at the mesting hold this week. This protects the ore vents in Nest End property and it will take a great deal to improve the stock. Beanont, the wonder of Tonopah, shows great ore bodies on the 700-foot level opened to, where ton after ion of rich shipping ore has been encountered. Cross-cutting on the 90 foot level also ran into large ore bodies and they are still buying the stock, the demand being very strong.

"A very conservative and one of the best mining experts, just returned from Tonopah, tells me this mine is one of the biggest in the camp, and has a possibility of seiling at \$10. They have an immense amount of ground and although vesterday's price of \$2.17 was somewhat forced, wagers are freely made he, a that it will cross Montana before January 1. Last week's ore shipment was 175 tons and a large treasury will insure dividends. Look for a reaction, and if stock touches \$2.10 would advise purchases. Butler very quiet and not much trading, probably due to inactive work. Considerable stock aftout here and in the East, but, at present prices, so large a proposition looks like a good investment, especially so it is owned by the Belmont and Tonopah of Nevada crowd, who are probably not quite ready to take it higher, but I look for such a move at any time. Weakness in Golden Anchor is due to large stock offerings from Pittsburg and no ore shipments; property is being systematically developed and I look for much higher prices as soon as floating stock has been digested.

"West End shipments were 45 tons and the stock is in strong demand, being

digested.
"West End shipments were 45 tons and

"West End shipments were 45 tons and the stock is in strong demand, being picked up around \$1.20. Strongly advise its purchase, as crowd hold together well, being backed by Borax Smith. Feel confident that stock will sell for \$2 within six months. This will help Ohlo, which is also a good buy at 25 cents. Tonopah Extension is being bought by Schwab and friends, who now have all Robert Hall's holdings, some 75,000 shares.

"Silver Pick, which was bought at 12 and 13 cents in bundles by Goldfield, is coming back from there, which is not a healthy sign. Jumbo jumped from 50 cents to \$1, due to the declaration of a 10-cent dividend. This comes from ore taken out last year, and the settlement of the suit released the restraining order on the treasury. Kendall is probably the best of the Goldfields at present prices. Dlamondfield Consolidated is daily improving. Don Gilles informs me of the wonderful showing, with many tons of rich ore and new strikes. It looks like a comer. All the better class of Goldfield stocks have a buillah appearance. All Bullfrog stocks are quiet and inactive, excepting Gold Bar and Denver. Information leads me to look for a buil movement next week and Eastern inquiries for large blocks have been received daily. I look for great activity from now to the end of next week, with a general improvement."

Pembroke Stationery Co.

Are headquarters in the West for surveying instruments, engineering and architects' supplies; also blue printers.

QUAKER CAPITALISTS BUY MOAPA GROUND

Rich Gold and Silver Ledge Is Found on Green Light Group Near Caliente.

CALIENTE. Nev. Dec. 16.—Johnson & Morton, owners of the Last Chance group of claims, located northwest of Moapa, have just closed a deal for the sale of the property to McBride, Long & Wilberforce, mining capitalists of Philladelphia, for \$20,000. These claims are grass-root propositions, values up to \$16, in gold having been found in pay qualities. Nearly 400 feet of work has been done in shafts, whaces and tunnels, and over five thousand tons of \$15 ore have been blocked out, ready for extraction. Lack of capital compelled the locators to part with their holdings, and the purchagers intend making immediate shipments of the ore already extracted, four carloads, which they state will average better than \$1000 per ton. They expect also to install a forty-stamp mill within three miles of their claims, for the treatment of the ore now blocked out.

Strike a Rich Lead. CALIENTE, Nev., Dec. 16.-Johnson

Strike a Rich Lead. Strike a Rich Lead.

Morris & Denney, owners of the Green Light group of gold-silver claims, west of Caliente, have struck a lead of ore three feet in width, showing values of 230 ounces silver and two ounces gold per ton, at a depth of sixty feet. They will make a carload shipment during the coming month and hope to make regular weekly shipments in the near future.

Jones & Norton, half owners of the Golden Eagle and Bald Eagle mines southwest of Callente, today brought in samples of ore showing pieces or gold scattered all through the quartax which is honeycombed and carries large quantities of brown hematite of iron.

Ships More Ore.

Ships More Ore.

Ships More Ore.

William Lawrence, owner of the rich Advance group of claims in Chief district, seven miles north of Callente, will make another two-carlond shipment of high-grade gold-silver-lead ore from his mine to Salt Lake City during the coming week. Mr. Lawrence is a Salt Lake man and since his purchase of the Advance group has been making shipments to Salt Lake smelters at a handsome profit. He has blocked out hundreds of tons of rich ore and expects to install a reduction plant with the opening of spring.

The Josephine Gold Mining company, the properties of which adjoin the Lawrence group on the south, are sacking high-grade ore for a shipment to Salt Lake next week. The officine expect to be able to continue shipments semimonthly during the winter months.

May Buy Clay Land

May Buy Clay Land

Samples of fire brick clay taken from a tract of land owned by Olson, Lee, Mc-Namee & Cook, lying west of Callente, were sent today to the Salt Lake Route people to Los Angeles parties who are considering the purchase of the property. A fine deposit of kuolin, lying north of Callente, has also been opened up and negotiations are now under way for its purchase.

DANGER FROM CHRISTMAS DIS-PLAYS AND DECORATIONS.

To the Public Your attention is hereby respectfully called to the fact that the introduction about premises of Christmas greens, barvest specimens and other inflam-mable materials, such as cotton to rep-resent snow, and the like, introduces an additional hazard not contemplated by the underwriters in issuing policies of indemnity covering the usual fire haz-ard, and in this connection we refer you to one of the conditions of the standard

form of fire insurance policy, wherein it is stipulated that: "This entire policy unless otherwise provided by agreement indorsed hereon or added hereto shall be void," etc., etc., "if the hazard be increased by any means within the control or knowledge

of the insured." In addition to the danger to property from displays referred to, the danger to

life in crowded stores or places of meet-ing by reason of a panic occasioned by a fire even though it be small and easily controlled, is so great that the underwriters, who have made a study of such hazards, would only be partly fulfilling their duty should they fail to give warning Electric displays where motors shunted or broken on different circuits

for advertising purposes will not be approved unless the devices for motive power and for the shunting and breaking of currents on different circuits are installed in accordance with require-ments of "National Electrical Code." BOARD OF UNDERWRITERS OF THE PACIFIC

By KARL A. SCHEID, Manager District "F."

Salt Lake's Only Pelvic Specialis DR. COOK

THE MOST RELIABLE AND EFFI-CIENT SPECIALIST IN UTAH, WITH METHODS OF TREATMENT THAT DO NOT FAIL TO CURE

BLOOD POISON, SK DISEASES, PILES, RU TURE, VARICOCEL HYDROCELE, STRE TURE, NERVOUS D CLINE, SEXUAL WEA NESS, LOST MANHOC Diseases of the Kidne Bladder and Prostate.

IMPORTANT-I will cure you for less money than you can be treated by any other specialist in Utah. will have to come to me sooner or later in order to be properly cured; why not before you have lost your m in doctoring with cheap or dishonest, unskilled specialists?

CURE OR NO CHARGE-ABSOLUTELY NO CHARGE UNLESS SATISFACTION IS GIVEN. My pat receive a written guarantee to refund every dollar for services if they do not receive a complete, lifelong and entire satisfaction, and I have made a deposit of \$500.00 in the Bank to secure any contracts that I do

THE ONLY DISEASES I TREAT, OF WHICH I HAVE CURED MANY A MAN AFTER HE THOUG HIMSELF INCURABLE, FROM THE FACT THAT OTHER SPECIALISTS HAD FAILED.

PILES or Hemorrhoids are small vascular tumors situated they have a most degrading influence on the general health. I cure Piles without cutting, nor do I use any ligatures or carbolic acid injections which treatment has rulned many. My treatment is safe, painless and quick, causing no detention from business, and when you are dismissed by me you are cured for life.

RUPTURE Properly termend Hernia, is an affection in the region of the Pelvie system, and is an escape or protrusion of the bowel from the lower part of the abdominal cavity. The tendency of Rupture is always progressive, and the symptoms are usually so slight as not to warn the afflicted, even though he be in imminent danger. Rupture frequently results in strangulation and death. Trusses should not be worn continuously, as they only ag-

gravate the trouble.

I have a sure, safe method of curing Rupture. Besides being absolutely reliable, it is painless and harmless. It makes no difference how many times you have been treated, I can cure you and will guarantee entire satisfaction or refund money.

HYDROCELE Is an accumulation of serous fluid in the scrotum or bag and involves the cords to which the testicles are suspended and deprives the sextual organs of all vitality. It results from injury and is sometimes difficult to distinguish from Rupture or Varicocels.

The remedy I use for curing Hydrocele completely obliterates the tumor at once, and by use of a preparation for a few days not a sign or symptom of the disease ever reappears.

VARICOCELE is a Pelvic disease, and is simply veins curdled or stagnant blood similar to varicose veins occurring in any other part of the body. This overflow and clotted accumulation is caused by undue excitement and weakness of the sympathetic or ganglionic nerves that regulate the supply of blood in any organism.

Every man afflicted with Varicocele of long standing knows that it has blighted his life, and that he has made a great mistake in not having himself cured. The disease not only endangers, by complication, every organ in the same region, but by sympathetic irritation destroys the nervous system and renders a man a complete wreck physically, mentally and sexually.

tem and renders a man a complete wreck physically, men-tally and sexually.

There is no operation about my radical cure for Varico-cele, neither any pain nor detention from business. My pro-cedure consists of absorption, by which means the stagnant blood is transuded into the cellular tissue and finally ejected in the same manner as other waste matter is thrown off. The ganglionic nerves are restored to their functional force by the administration of a tonic, and a complete cure is pos-sible in every case.

BLADDER TROUBLE The neck of the bladder is oftener affected and becomes catarrhal, discharging mucus, blood and, weakened by inflammation, the flow of urine is either cut off or unlimited, allowing dripping, as well as poinful symptoms.

By my modern method of illuminating the bladder I have no trouble in discovering the nature of the disease, and by directly and scientifically medicating the affected region I accomplish remarkably quick and permanent cures.

ENLARGED PROSTATE Results from inflammation structing the urinary canal and rectal bussage, producing painful urination and chronic constitution. My specific treatment removes the inflammation, reduces the enlargement, a normal condition is resumed and 10 per cent of the cases I treat are permanently cured.

BLOOD POISON Properly termed Syphilis, and that infects the blood It is both hereditary and cont the former may appear at birth or any time thereaf latter manifested by stages known as primary, see and tertiary It is needless to explain to its victim the of this disease, as he realizes from its monstrous grass than could ever be told. Such evidence as ulcers of the cous membrane in the mouth and throat, sores on a of the body, aching of the bones, spots and all discolo of the skin signify decay and permature death.

My treatment for Blood Poison is a Specific Seru completely reorganizes the blood corpuscles, by which every particle of infectious matter is eliminated. The edy for syphilis is the result of many years of expertion, and has been thoroughly tested in the most cases, and has never falled to eliminate the disease a sign never reappears. Under my system of treatment of the action of the stage of the could be system of treatment of the stage of the system of treatment of the system of the system of treatment of the system of the syst

STRICTURE of the urethra is a very annoying of the Pelvis, and is important because the second of the Pelvis, and is important because the second of the Pelvis, and is important because the second of the second o

NERVOUS AND SEXUAL DECLINE The NERVOUS AND SEXUAL DEULINE center nerves supply and contribute all the force and active the great human structure or any part thereof to the great tenters are the reservoirs of force, and a to decay of any of the great centers of motion distributions of the nerve filaments in that region, and a to decay of any of the great centers of motion distributions are supply to the great tenters of motion distributions in the region, and as the supply of the general health; therefore, they should have distered and by a competent physical in treating Pelvic diseases, from which nearly all and sexual disorders originate. I have farticular all and sexual disorders originate. I have a thorough knew of the seat and cause of the disease which is always sary to insure success in treating any affliction. Day Night Emissions, discharges too quick, head and ba nervousness, despondency easily exhausted and man similar symptoms are dangerous, and quickly cured method.

KIDNEY COMPLAINTS Kidney diseases are in ignorance of their trouble and attribute their condition to some other cause. Male excesses, illuors severe sickness, which weakens the kidney produce kidney diseases, and the usual symptoms are colored urine, with strong odor, sediment in urine, urination, or irregular, chilly and feverish spells, feeling, puffness under the eyes or swellings.

My long study and extensive practice in the treatful forms of Kidney Diseases have familiarized me to tent that I have attained skill which insures successful ment in all cases that are not incurable. I determine dition of the kidneys by a scientific analysis of unimary severe kidney troubles I have cured by my sycourse of treatment, after being election as incorother physicians, gives me such confidence in my me to assure every case I accept a permanent cure.

to assure every case I accept a permanent cure CONSULTATION FREE, CONFIDENTIAL AND INVITED .- A personal, thorough and searching examples of the control of th tion is desired, though if inconvenient to call, write me a full description of your trouble. Office hours: 9
